Youth in Transition to Independent Living

Summary of Curricula

Compiled by:

The National Resource Center for Family Centered Practice
University of Iowa School of Social Work
Miriam J. Landsman, Ph.D.
Patricia C. Gilbaugh, Ph.D. Candidate, LMSW

Raymond A Kent School of Social Work
University of Kentucky in Louiville
Anita Barbee, Ph.D.
Jenny Taylor, LICSW
Erin Beth Moran-Hickerson, PhD Candidate, MSSW
Referenced Curricula:

</table>
Life Skills: addresses the hard or “tangible” skills youth should possess prior to emancipation (ex. budgeting, how to interview, how to buy healthy food, etc)
Social Skills: addresses soft or “intangible” skills youth need to possess prior to emancipation (ex. problem-solving skills, social skills, anger management, etc)
Role Plays: are role-plays offered to assist youth in understanding “real life” and/or are role-plays offered to help workers understand what transition is like for youth
Advocacy: addresses if the training promotes self-advocacy or advocacy for foster youth in a broader text
Attitude: discusses how to work with youth who are difficult to work with
Substance Abuse: the training addresses substance use/abuse issues
Transition Planning: describes a transition plan or how to create one
Special Program Modules: other issues that may be given special attention
Engagement Strategies: discusses how to encourage youth involvement in their own lives
* = Power Point electronically available
N= Detailed notes are available
Boston Curricula S.W. O. T. Analysis

**Strengths:** The training is broken down into ten nicely organized modules with clearly defined objectives and time lines. Modules 5 and 6 look at transitioning to independence and offers ideas to encourage youth engagement (i.e. DOMG in Module 6, p. 6). This training hits nicely on all four core principles and sprinkles in conversation boxes of “Youth’s Views” on varying topics (usually found in each training Module) while stressing the Positive Youth Development theory (focused on in Module 1, but found throughout regarding how all topics can be applied to PYD).

**Weaknesses:** Collaborations with community groups and services is not clearly defined, yet provides more of a focus on collaborations between the youth and their worker (Module 5, p. 10). Permanent connections are address regarding positive social connections and less to do with creating long-term relationships with helping adults with minimal attention to maintaining ties to foster families and biological families. This training also does not stress the “hard skills” needed for successful transitions. And although youth voices are sprinkled into the training, this training is facilitated by professionals.

**Opportunities for ideas:** This training brings back the ever-useful Eco-Map (Module 7, p. 9) to help youth look at current supports and where support may be lacking. The use of case vignettes (Module 6, p. 8-11 and Module 3) are helpful to practice training objectives in the moment, while using the Fish Bowl exercise (Module 7, p. 13-14) allows the opportunity to hear a variety of participant voices in a controlled manner.

**Training Technique:** Many positive training techniques are used here to reinforce the Boston model including those mentioned above, as well as large and small discussion groups in nearly all Modules, roles plays (Module 2, p.4), handouts, flipcharts and small group or individual activities, like the one in Module 2 (p.3) in helping participants recognize the multiple cultural memberships we possess to help us to better understand ourselves and to assist our youth in their transition journey.
**Denver Curricula S.W. O. T. Analysis**

**Strengths:** This curriculum identifies and utilizes existing resources from other organizations. They include ordering or bibliographical information to make it easier to obtain the same resources (i.e., videotapes). Each module contains handouts, powerpoints, and detailed trainer’s notes. Unique to this curriculum is a module specifically for training professionals about youth who are differently-abled, but do not meet the disability criteria. Each module contains helpful role-plays, scenarios, and group activities.

**Weaknesses:** The curriculum does not include ideas for engaging youth in their transition planning, nor does it address attitudes and advocacy issues. Nearly all of the curriculum is focused on what social workers do, or behavior of social workers, in relation to how their actions may influence the youth they work with.

**Opportunities for ideas:** “We to Me” is designed to get participants to think about how culture influences youth learning independent skills. Knowledge tests accompany each module. The “Cultural Mix” module has several case scenarios and role-play skits. Section III of “Planning in Advance” module refers to using a video developed by Eastern Michigan University under the same grant (Section III, p. 2). Section IV of “Planning in Advance” module refers to a video about youth speaking on the loneliness of being emancipated without permanency and the importance of youth to have connections. The film was developed by the Casey Foundation and the state of Colorado (Section IV, p.2). A detailed description of how youth with special needs respond to help can be found on p. 9-13 of “Between Teens” module. “In our own Voices: Foster youth tell of life in care” video referred to in “Problems Solvers” module on p. 6. The video has 10 digital stories developed by foster youth, of which two are integrated into the curriculum. “What do we know about youth mental health and substance use” quiz about research findings is found on p. 3 of that module.

**Training Technique:** Handout I-a is a group activity to be used as an ice-breaker for introducing cultural competence. Handout I-e can be read as a skit for a large group activity to explore spirituality and religion as part of cultural competence. Handout I-g describes the stages of Cultural Sensitivity. Handout II-a trains on ethnographic interviewing in child welfare. “Planning in Advance” module trains on emotional intelligence (section II). Section IV of this module trains on connections. Substance abuse and mental health training is synthesized and included in the “Youth as Problem Solvers” module.
Fordham Curricula S.W.O.T. Analysis

**Strengths:** Although this training is facilitated by professionals, it notes having had collaborative youth involvement to help create this training to represent the youth voice. In Box 1, #11 Fordham provides a great chart looking at adolescent development of physical, emotional, cognitive, social and moral as well as the tasks, attitudes and behaviors associated with that as well as the impact of foster care on this development. Also provided is an exercise to help us see that looks can be deceiving (Box 3, #3). Fordham offers a module on adolescent sexuality and sexual development which can be found in Box 2. In Box 4 we find some nice assessment tools and #6 outlines the S.M.A.R.T. goals for creating challenging but attainable personal goals for youth.

**Weaknesses:** Greater attention to organizing this training could have been useful as well as bringing a clearer focus to the cultural competency piece. Although cultural competence is mentioned and tended to, there is not a good deal of information there. Another struggle is with the lack of planning for permanent connections for greater support and well-being.

**Opportunities for Training:** The “Choosing Partners” exercise in Box 3, #3 is a great exercise to help you see where your own biases may lie and an activity entitled “Myth or Fact” in Box 2, #4 is a great exercise for youth to discover that some of what they have been told about sexual development and sexuality may not be as valid as they thought.

**Training Techniques:** The above mentioned activities are both challenging and interesting to add to any training. Many of the other techniques used in this training are handouts and blank worksheets (Box 4 #4) that help to reinforce the material as well as giving the participant tangible resources to take with them and use with youth as appropriate. Another positive training technique used is by turning a common game show into an exercise in reinforcement; Independent Living Jeopardy (Box 1 #15) is a great example of this.

---

Note: This curricula is divided up into boxes and then numbered, so you will see notation to reference specific elements in Boxes 1, 2, 3 or 4 and then the number it is designated within that box. For example Box 1, #1 discusses worker competencies.
Kansas Curricula S.W.O.T. Analysis

**Strengths:** Curriculum tends to be heavily focused on policy affecting IL youth. Competencies for the training were developed by Kansas youth.

**Weaknesses:** Training presents many ideas but not enough strategies to achieve goals. Skills are discussed in the last sessions of the curriculum but without procedure. Collaboration is a strong area in this training but needs more detail. The trainer’s manual does not provide much guidance.

**Opportunities for ideas:** Ideas would be to mention more of the skills to achieve the goals and competencies presented.

**Training Techniques** Techniques include lecture and video segments.
North Carolina Curricula S.W.O.T. Analysis

**Strengths** Positive youth development is a strong theme throughout training. Session 7 deals directly with youth development. A matrix is included outlining skills, health, employment support needs for youth and strategies to achieve. The curriculum is divided into 8 sessions, with each session containing facilitator notes, a list of materials needed, highlights and challenges of the session, and a list of key concepts. Each session is outlined and an appendix contains all the participant handouts and overheads. The materials have a substantial amount of depth.

**Weaknesses** Training seems to be too interactive at times without enough information being given to participants. Needs to be more specific on culture as defining the person not the societal actions.

**Opportunities for ideas** More discussion would be helpful. Curriculum presents great ideas but am unsure if everything is conveyed through the activities. The training sessions are listed on page 35 with an accompanying description of each session. They are as follows:

- **Session 1: Personalizing Youth Work.** This session introduces the concept of positive youth development.
- **Session 2: Measuring Success.** This session emphasizes how workers can use youth development outcomes successfully with youth in care.
- **Session 3: Connection with Youth Culture.** This session identifies challenges, barriers, and opportunities for youth input and participation.
- **Session 4: Seeing Me Through Your Eyes.** This session presents approaches for increasing youth input and participation.
- **Session 5: Opportunities for Positive Youth Development.** This session promotes the application of workers’ knowledge and skills for positive youth development.
- **Session 6: Supports for Positive Youth Development.** This session teaches participants three types of support that youth need for positive development, which are emotional, motivational and strategic.
- **Session 7: Family and Community Connections for Positive Youth Development.** This session promotes strategies for connecting youth with relationships and resources that promote their positive development.
- **Session 8: Walking the Talk.** This session reviews the knowledge and skills participants obtained through the training and how these will be applied to promote positive youth development.

**Training Techniques:** Video created by youth, discussion and activities with each session. A “positive youth development” activity is on page 7 of session one. It introduces the training and gets participants focused on why this training is important. Page 25 of session one has a handout listing the characteristics of supportive adults based on a survey of youth. Page 29 of session one is a handout that identifies youth development outcome areas. Each session has compiled step-by-step instructions for learning activities.
Maine Curricula S.W.O.T. Analysis

**Strengths** Advocacy session that described the need and provided strategies. The coaching session was also useful as another way to look at the supports youth need.

**Weaknesses** Skill-building was a weaker area. In the coaching session, the importance was placed upon communication skills. This left out many crucial skills needed by youth.

**Opportunities for ideas** Improving the weaker areas of training such as culture and skill-building would make this an important knowledge base for positive youth development among workers.

**Training Techniques:** Techniques include discussion, activities, video, and books.
Oklahoma Curricula S.W.O.T. Analysis

**Strengths:** Section 12, “Culturally Competent Teaching Strategies” (p. 86-91) focuses largely on how to engage youth in the training of life skills. The curriculum is laid out well and is very organized with a detailed trainer’s manual and a second, complimentary participants’ manual, which has several worksheets to engage trainees in active learning processes. They used very clear objectives in most sections and tied most sections to a defined competency.

**Weaknesses:** Advocacy is not clearly linked to training materials, nor is it linked to any of the competencies identified in the content. Its presence, though, can be found in pages 111-115. Permanency connections is addressed on a global “resources” aspect, rather than as establishing a permanent home post emancipation. Independence is emphasized as an investment in the community rather than establishing connections with individuals or creating a support network for future safety nets. They do, however, discuss the influences of past connections. Life information is very subtle and hidden in assessments and goal planning. Safety nets are mentioned, but not specifically trained.

**Opportunities for ideas:** A “tear-jerker” letter from a child in custody is found in the participant manual’s appendix, pages 76-77. The letter is useful in demonstrating what it might be like to transition out of care after a long period of foster care drift. The Module, “Four Phases of Life Path” (p. 80-85) is a great training idea to have participants explore culturally-related concepts in the life course of adolescents. The module, “Naturalistic Inquiry,” (p. 133-136) is a solid beginning step to help youth start thinking about setting goals. Entire sections are devoted to “Indian Child Welfare Act” and “Historic Distrust” (p. 56-66). This information can be useful to integrate into other curricula for inclusion of the Native American race in the development of cultural competence training.

**Training Techniques:** “Minefield” (p. 108-111) is a learning activity that uses role-plays and physical movement to simulate youth navigating the child welfare system. This would be a great activity to bring out barriers to local community services, language and cultural barriers, and other challenges associated with transitioning. Another similar group role-play is found on page 97. Several times throughout the training, the facilitator asks the participants to practice using tools (worksheets) in the manual during the training.
San Diego Curricula S.W.O.T. Analysis

**Strengths:** The training is structured by breaking down the issues into three major levels – Macro, Mezzo, and Micro levels. This plays well for coordinating all areas of need for youth in transition, looking at policy all the way down through making permanent connections for personal support. A wide array of need is covered, yet one does not feel overwhelmed by the broad spectrum due to positive organization. Two binders accompany this main training, one for the participant and one for the trainer. The trainer version has greater details on instructions for activities and also includes “Trainer Tips” for additional information or to help keep moving a discussion along if stuck, while the participant binder has all the needed resources to share with the youth with whom they work. A third binder helps guide participants through a simulation called “Teen Time” which helps workers “walk a day in the life” in another role. Although youth are not the main facilitators of this training, a youth panel is an optional activity and via video clips, a strong youth voice is present throughout the training.

**Weaknesses:** More attention could be given to the special issues such as substance abuse, mental health issues and obtaining more of the supports needed to obtain or maintain health in those areas.

**Opportunities for Training:** The use of the simulation “Teen Time” is a great way for workers to put themselves in different roles to help acknowledge how many different players the youth is juggling. The use of the video clips (present throughout the training) is a positive way to infuse a youth voice on varying issues. Another positive use of a case study is introduced to us (initially on page 64 of the trainer binder) and used throughout the training as a tool to look at adolescent development and assessment (p. 106 trainer binder) for examples.

**Training Techniques:** If possible to gather a youth panel and prepare them as San Diego did, this can prove to be a great strength for sending a strong message (p. 19 participant, p. 24 trainer), and again the video clips tell a story in youth’s own words as well. Revisiting one case study throughout the training helps to bring familiarity to the case as well as using different skills as one would with their own clients. This training keeps the participants involved by asking for volunteers for group discussions, role-plays (i.e. Teen Time) and reflections on their own work – helps to keep the group tuned in and eager to hear more. Finally, this training ends with a powerful exercise called, “Web of Support” (p. 113, trainer) where participants are in a circle and while stating what they commit to do for youth in care they pass around a ball of string or yarn, making a “web of support”.
San Francisco Curricula S.W.O.T. Analysis

**Strengths:** Chapter 3 describes the 10-step curriculum development process. A 4-step development process is illustrated on p. 31 with a helpful debriefing/evaluative worksheet. The curricula places a strong emphasis on attitudes and values reconstruction. Each unit uses active learning strategies to engage participants in the training and helps participants identify with the youth they serve and the discrimination issues the youth face.

**Weaknesses:** While the depth of the cultural competence is a strength, the curriculum is lacking in breadth. There is very little content about teaching policy issues, life skills, and establishing permanency. There is a heavy emphasis on getting participants to identify with what the youth have been though in the past, but little focus on how to help them plan for the future. Most content is past and present focused, and extremely limited in forethought and transitional planning. There is an “overkill” on creative teaching and teaching moments theme. This curriculum is lacking in substantive content on the issues youth face. For example, “Buying Time” skit (p. 50-54) seems to be an example of how social workers shut out their clients, but it’s not very useful for training supervisors unless you modify the skit to be an interaction between supervisor and supervisee—and then it’s not clear what the purpose of doing it is for.

**Opportunities for ideas:** Includes information on foster youth rights and a glossary of terms at the end of the manual. Samples of youth testimonials are found throughout the curriculum. “Foster Youth Testimonials” module (p. 55-62) addresses the effects of labeling youth. A module about story-telling is found on p. 63-67, which engages youth by using life experiences to create teachable moments. The entire curriculum seems to be based on a symbolic-interactionist approach. For example, “People Hunt” (p. 90-95) is a module created to develop awareness about the labeling and diagnostic process and its effects on youth.

**Training Techniques:** The communication skills module (p. 68-73) uses a learning activity called “Life™ Cereal Rebate Offer”. A module on attitudes impacting social work with youth uses a Treasure Hunt training technique (p. 115-118). “Super Social Worker” module (p.119-121) involves a learning activity where workers diagram their qualities as social workers on a self-portrait. “Recognizing Resources” includes a tool that makes learning about community resources a game (p. 106-107). “Milestones” is a survey tool identifying the transitioning youths’ milestones combining a visual and narrative technique (p. 77-78). “What Comes to Mind” is a learning activity asking participants to reflect on stereotypes through word and thought association (p. 140-142). “Taboo” is a module that exposes social workers to the challenges of gay foster youth (p. 131-139). Digital storytelling is taught using “mind maps” while viewing video clips (p. 43-47).
**SUNY Curricula S.W.O.T. Analysis**

**Strengths:** This training is broken down into 3 well-organized Modules of Power Point slides with explicit steps for introducing the material and has all of the handouts and worksheets available as attachments. A strong focus is on the needs of high-risk youth, using Strengths-Based (Module 1, slide 25) and Youth Development (Module 1, slide 45) approaches for effectively working with youth. Module 2 looks at Substance Abuse and Prochaska’s Stages of Change (Module 2, slide 18, plus handouts) which is a great assessment tool when looking at a youth’s readiness to change certain behaviors. Module 3 focuses on recruiting and sustaining supports for high risk youth and possible reasons why youth may be resistant and how to work with them in overcoming a fear of connections (Module 3, slides 7-12), while creating contingency plans and safety nets (Module 3, slides 23-31).

**Weaknesses:** This training lacks any focus on cultural competence and does not provide any of the hard/life skills needed for a positive transition into independent living – unless one decides to use the LifePak in this regard, but specifics are not given here. This training appears to be lacking in teaching “real life” skills youth will need to have to transition to life on their own. The overall focus on this training is how to best support youth *while still in care*; little attention is given to the actual time of transition and transition readiness.

**Opportunities for Training:** One activity seemed to stand above the rest. In Module 3, slide 32 participants completed a resource activity; dividing up the group into 4 and putting paper around the room with different needs (ex. mental health, substance abuse, sexuality, violence – or other pertinent needs) and the participants create a resource list that can later be helpful to youth as well as their workers – a collaborative effort in discovering resources in the area. Another great idea to help participants know what it feels like to move from different foster families and even from foster care into independent living is an activity called “Independent Living Human Machine” (Module 1, slide 17).

**Training Techniques:** SUNY offers a pre- and post-test as a way for both participants and trainers to assess the effectiveness of the training in terms of gaining knowledge, but this is an optional inclusion. Many worksheets and handouts can be found in the attachment for each module as well as activities like those mentioned above. A “Reframing” activity (Module 1, slide 30) looks at taking statements or phrases we might use and, with a partner, make those statements more neutral or positive. They use a case example and have the trainers perform a skit with a review (Module 2, slide 19). Use of Eco-Maps (Module 3, slide 5, 6), safety net and a Minefield exercise (Module 3, slide 29) where one participate acts as a youth trying to make their way to self-sufficiency while dealing with obstacles along the way. Finally, use of the LifePaks that youth take the lead in creating and have something tangible to take with them upon aging out.

---

2 Note: This training is divided into Modules according to the Power Point, so rather than referencing page numbers, this will refer to the module and the power point slide where you can find additional information.
South Carolina Curricula S.W.O.T. Analysis

**Strengths:** The curriculum includes the grant’s methodology section and a needs assessment of adolescents for independent living. The curriculum places a heavy emphasis on learning about group dynamics and group leadership. For example, page 4:2 uses a physical activity to teach about how groups form and how group leadership naturally emerges. First Voice trains on three levels: 1) Leading, which is a module used to train supervisors of case workers on their roles with transitioning youth; 2) Listening, which is a module that trains case workers on how to work with transitioning youth; and 3) Learning Together, which is a module that utilizes group practice with young adolescents in developing skills before reaching the age of having to develop a transition plan. An explanation of these three levels is available on page H1:3.

**Weaknesses:** This curriculum is still draft form. The most recent copy obtained was dated March 22, 2004 and was stamped with “draft” and had hand-written notes throughout the contents. It is unorganized and appears to be somewhat “thrown” together. It does not include anything on cultural competence and it is very weak in the youth development elements. The manual provides a lot of information about training notes for facilitators, but very little information about the content to train on.

**Opportunities for ideas:** A list of on-line resources is included in the curriculum. However, when checked on-line, the website links no longer worked or the resources referred to were no longer available. They use a concept of “Power To” versus “Power Over” to train supervisors.

**Training Techniques:** The curriculum requires advanced reading of some materials. A list of all the materials needed to train with are included in each module. Page H:1-2 teaches participants how to use the Ansell-Casey assessment tool and includes an FAQ to assist with being able to answer workers’ questions. This is one of the few curricula that provides training on adolescent stages of development. They included a table of the stages on page H3:1.
Eastern Michigan Curricula S.W.O.T. Analysis

**Strengths:** The training manual is very organized. Modules are clearly labeled. Each module includes a separate table of contents for each section, and begins with a description of their approach to curriculum and training tips. Specific goals of the entire curriculum are on p. ii. The manual includes four DVD’s for the video clips described and included in the training curriculum. Uniquely, this curriculum provides thorough information on how to train workers to think in terms of building youths’ positive self-image.

**Weaknesses:** While the curriculum is strong in collaborations and building community, it does not clearly link these efforts to creating a safety net, providing life information to youth, or teaching hard skills to youth. Furthermore, the modules lack breadth and depth in addressing the core requirements for cultural competency and permanency.

**Opportunities for ideas:** Each module begins with a cover sheet identifying the goal for that module and the specific competencies. Module 2 trains on how to help youth build a positive self-identity, emphasizing a strengths-based approach. This module uses the sociological concept of *reference groups* to talk about how youth construct their worldview. Module 3 opens with a discussion of “transitional responding” as a method of using exploratory skills by workers to stimulate youths’ deeper levels of thinking about situations. Module 4 is strong in teaching soft skills to youth. Module 6 focuses on hard skills and provides a number of useful handouts.

**Training Techniques:** DVD clip 1.1 presents adolescents talking about the challenges and rewards of their relationships with their social workers. The clip, “Tuning In”, is a former foster youth talking about his experience. “Identity Assessment” on page 17 of Module 2 and “Strengths/Challenges Tracking Sheet” on page 18 of Module 2 are two handouts that were constructed to help train on positive self-discovery of youth using a strengths-based approach. Module 3 includes a section on “Spheres of Control” and “Types of Power”, p. 9-11; handout on p. 20. Module 4 contains a “Negotiating the System Simulation”, p. 4-6. Each position in the role-play has an instruction sheet in the Module. “Making a Successful Referral” training can be found in Module 4, p. 14. An accompanying handout is on p. 23. “Youth Tool Kit-The Goal Checklist” on p. 14 of Module 6 breaks down specific goals in 6 domains adolescents need to achieve success in order to experience a successful transition.
